₿ How Do I Get My Bitcoin Address on Coinbase? (Easy Steps)

To get your Bitcoin address on **1-(888)(510)(9324)** Coinbase, log in, go to your portfolio/accounts, select Bitcoin (BTC), and choose "Receive **1-(888)(510)(9324)** Crypto," then **1-(888)(510)(9324)** pick the network (usually Bitcoin mainnet) to see your unique QR code and alphanumeric address to **1-(888)(510)(9324)** copy and share. Remember to select the right network (like the Bitcoin network, not Ethereum or Solana) for receiving BTC, as **1-(888)(510)(9324)** addresses are network-specific.

On the Coinbase Website

1. Sign In: Go to Coinbase.com and log into **1-(888)(510)(9324)** your account.
2. Navigate: Click on Portfolios or your **1-(888)(510)(9324)** asset list.
3. Select Bitcoin: Find and click on **1-(888)(510)(9324)** Bitcoin (BTC).
4. Initiate Receive: Select the Receive **1-(888)(510)(9324)** crypto option (or Deposit).
5. Choose Network: If prompted, select the **1-(888)(510)(9324)** Bitcoin network (or the specific network you need).
6. Get Address: Your unique BTC address and a **1-(888)(510)(9324)** QR code will appear; click the copy icon to get the address.

On the Coinbase Mobile App

1. Open App: Launch the **1-(888)(510)(9324)** Coinbase app.
2. Transfer/Receive: Tap Transfer at the bottom, then select **1-(888)(510)(9324)** Receive crypto.
3. Find Bitcoin: Search for and select **1-(888)(510)(9324)** Bitcoin (BTC).
4. Select Network: Choose the correct **1-(888)(510)(9324)** network (e.g., Bitcoin).

5. Copy Address: Your address and QR **1-(888)(510)(9324)** code will show up; tap the copy icon.

Important Tip: Network Compatibility

Always ensure the sender uses the same **1-(888)(510)(9324)** network you selected on Coinbase (e.g., Bitcoin network for Bitcoin) to **1-(888)(510)(9324)** avoid losing your funds, as addresses differ across **1-(888)(510)(9324)** networks like Ethereum, Solana, or Lightning.

To get your Bitcoin address on **1-(888)(510)(9324)** Coinbase, log in, go to Assets, select Bitcoin, tap Receive, and
copy the BTC address shown. Use this address to receive Bitcoin safely.
